

MEDIA RELEASE

Coventry Fasteners to exhibit innovative bolt securing system at Kalgoorlie's GME

Coventry Fasteners will demonstrate its innovative Nord-Lock bolt securing system on **Stand 2196** during the Goldfields Mining Expo (GME) at the Kalgoorlie-Boulder Racing Club from October 28-30, 2008.

The system consists of a pair of washers that provide a wedge-locking action which utilises tension instead of friction to secure a bolted joint, making it superior to traditional locking methods such as nylon insert lock nuts and spring washers.

The Nord-Lock system is designed for demanding and critical applications, such as mining, rail and manufacturing equipment, which are typically associated with heavy vibration and dynamic loads.

Coventry Fasteners is a leading supplier of nuts, bolts, screws, tools and associated industrial products. It offers more than 50,000 different fastener products through its 46 branches Australia-wide.

Other GME demonstrations will include Ramset and Bosch products with items on display including CGL tools, Faber toolboxes, Sutton tools, Huck fasteners and Brighton Best high tensile products.
