

MEDIA RELEASE

## New Topcon distributor shows latest products at Kalgoorlie's GME

**Position Partners**, the new national distributor for Topcon Positioning Systems will be displaying some of the latest Topcon products for mining, surveying and construction applications on **Stand 1043** during the Goldfields Mining Expo (GME) at the Kalgoorlie-Boulder Racing Club from October 28-30, 2008.

Position Partners combines Topcon's network of major independent Australian dealers – including WA Topcon dealer **Stadia Instruments** – creating the country's largest and most experienced specialist in the precision positioning business.

The formation of Position Partners has also resulted in one of the largest Topcon distributors in the world.

Products displayed on the Position Partners stand at GME will include:

- Topcon's new X42 and X62 excavator guidance systems, with capacity for full 3D GPS+ machine control, allowing it to work off a digital site model, increasing productivity even further
- Topcon's new 9000IS scanning total station
- The Topcon Hiper Ga digital GPS/Glonass rover receiver
- Topcon survey and construction lasers.

Topcon's 9000 IS scanning total station combines advanced imaging and high-accuracy surveying, incorporating real-time field imagery using the latest digital camera technology with spatial data.

Its functionality is controlled using Topcon's patented ImageMaster software to produce "photography with dimension", a cost-effective alternative to laser scanning

At the same time, it incorporates all the functionality of Topcon's GPT-9000A series robotic total station, including precision measurements to 2000 m, cable-free system design plus the longest range, and most powerful reflectorless technology available.
