

MEDIA RELEASE

## CoolMist Systems to show outdoor heat, dust and odour relief solutions at Kalgoorlie's GME

**CoolMist Systems Australia** will showcase its environmentally friendly solutions for outdoor cooling, dust suppression, humidification and odour control on **Stand 2442** during the Goldfields Mining Expo (GME) at the Kalgoorlie-Boulder Racing Club from October 28-30, 2008.

The WA-based company's dust suppression systems are suited to mine sites, quarry crushing plants, ore conveyor systems, stock piles, workshops, foundries and construction sites.

Designed to withstand harsh environments, the systems minimise dust without wetting surface areas and are customised to each operation.

CoolMist's outdoor cooling systems can reduce air temperature by up to 10° C by delivering a cooling mist of very fine water droplets that are less than 10 micron in size and which absorb heat as they flash evaporate in the air.

According to CoolMist, both the outdoor cooling and dust suppression systems encourage better productivity, make for a safer working environment and assist with compliance of health regulations.
