Western Australian School of Mines to focus on high quality education at Kalgoorlie's GME

Western Australian School of Mines will focus on its undergraduate and postgraduate courses on **Stand 1042** during the Goldfields Mining Expo (GME) at the Kalgoorlie-Boulder Racing Club from October 28-30, 2008.

With campuses in Perth and Kalgoorlie, the Curtin University school offers undergraduate courses in:

- mining engineering
- minerals engineering and extractive metallurgy
- mining and applied geology
- spatial sciences
- exploration geophysics.

Postgraduate courses include mineral economics, mining engineering, mining geomechanics, mine planning, metallurgy and mining geology.

They are designed to give graduates the opportunity to gain high quality education that combines practical and theoretical elements, have flexible study modes and attract strong support from industry sponsors and professional bodies.

"GME will be a great opportunity for people interested in the mining industry to find out what educational opportunities are available and for people already in the mining industry to discover ways to enhance their careers through education or to change the direction of their careers," WASM representative Cari Furman said.

Lecturers will be on hand to discuss these opportunities.

WASM has been locally and internationally recognised as a provider of excellence in minerals education, research and industry service since 1902.
